An NSF Industry/University Cooperative Research Center
Our Team

CR³ Center for Resource Recovery and Recycling

Brajendra Mishra

Diran Apelian

Corby G. Anderson

Bart Blanpain

Toyohisa Fujita
The Center for Resource Recovery and Recycling (CR³) is committed to being the premier cooperative research center focused on sustainable stewardship of the earth’s resources.

Our focus is on helping industry address a pivotal societal need – the need to create a sustainable future. At CR³ you will advance technologies that recover, recycle and reuse materials throughout the manufacturing process. These advancements will help your business reduce energy costs and increase profitability, while protecting our natural resources.

Proprietary Information-dissemination and use restricted to members of the Center for Resource Recovery and Recycling
As a CR³ member your company...

- submits and votes on research projects undertaken annually by CR³
- networks with global industry leaders
- has royalty-free IP rights to pre-competitive research
- may opt to sponsor company-proprietary research that remains exclusive
- has access to findings from large-scale projects funded by the U.S. government or foundation grants
As a CR³ member your company...

- can recruit top students from various engineering disciplines
- has access to all (past and current) CR³ technical reports and process data
- membership fee is used for research expenses only without any institutional overhead
- has access to characterization facilities at all member institutions
- can consult CR³ faculty, which helps members get timely solutions to factory floor problems without additional cost
- can sponsor student projects (senior thesis) and industrial internships
As a CR³ member your company...

Can work with sister centers, such as:

- Advanced Casting Research Center (ACRC) and Center for Heat Treating Excellence (CHTE) at WPI
- Kroll Institute for Extractive Metallurgy at CSM
- EIT-KIC Programs at KU Leuven and
- Research into Artifacts – Center for Engineering at Univ. of Tokyo

to broaden your understanding of research in recycling at partner universities.
2010-2016

Projects:

• 22 Completed Research Projects
• 10 Current Research Project
• 1 Project to begin in July, 2017

Patents: Provisional and full patents granted: 7

Students Graduated & Placed: 14
Our Achievements

2010-2016

Publications:
  • Journals: 40
  • Conference proceedings: 30
  • Conference presentations: 60

Journal Launched: Journal of Sustainable Metallurgy (Springer)

Publicity & Promotion:
  • Website, e-mail, marketing and industry press

Professional Partnerships:
  • TMS – REWAS, Engineering Solutions For Sustainability
  • KUL – Bauxite Residue Valorization
Completed Research Projects

• Development of Aluminum-Dross Based Materials for Engineering Application (2011)
• Physical and Chemical Beneficiation for Recycling of Photovoltaic Materials (2011)
• Recovery of Rare Earth Metals from Phosphor Dust (2011)
• Recycling of Bag-House Dust from Foundry Sand (2011)
• Molten Metal Compositional Sensing to Enhance Scrap Recycling (2012)
• Rare-Earth Recovery from Magnets, Catalysts, and other Secondary Resources (2012)
Completed Research Projects

• Recovery of Eu/Y from Phosphor Dust (2013)
• Conditioning of Machined Chips (2013)
• Beneficiation of Flat Panel Functional Coatings (2013)
• Metal Recovery via Automated Sortation (2013)
• Recovery of Value-Added Products from Red Mud and Foundry Bag House Dust (2013)
• Dezincing of Galvanized Steel (2014)
• Development of a Novel Recycling Process for Li-Ion Batteries (2014)
Our Achievements

Completed Research Projects

- Fundamental Study of Lithium Ion Battery Recovery (2014)
- Recovery of Zinc and Iron from EAF Dusts (2015)
- Recovery of Valuable Metals from Fines (2016)
- Value Recovery from Mining Wastes (2016)
- Battery Design for Disassembly in Support of Materials Reuse (2016)
- Rare Earth Metals Recovery from Bauxite Residue (2016)
Our Achievements

Current Research Projects

• Hydrometallurgical Treatment of e-Scrap (Jul 2017)
• Online Slag and Bullion Analysis by LIBS (Dec 2017)
• Recovery of Valuable Metals from Flue Dust and Other Fines from Mechanical Treatment of e-Scrap (Dec 2017)
• Reuse Opportunities for Bauxite Residue (Dec 2017)
• Electro-Oxidation of Metals & Inorganics (begins July 2017)
Current Research Projects

• Scrap Characterization (May 2018)
• Pretreatment Processes of Waste Printed Circuit Boards (June 2018)
• Vacuum Distillation of Complex Lead Bullion (Sept. 2018)
• Waste Water Treatment Sludge & High Value Grinding Swarf Recycling (Sept. 2018)
• Separation of Eu and Y from Phosphor Dust (Sept. 2018)
• Innovative Refining Technologies for Sb Recovery (Dec 2018)
Research Funding 2010-2016

Industry membership: 4.5 million USD

Federal funding: 1.2 million USD (NSF to WPI/CSM)

Leveraged federal funding: 1.5 million USD
Our Achievements

CR³ Center for Resource Recovery and Recycling

Companies Launched

Kinetic Batteries, LLC

Battery Resources, LLC
Our Graduates

Employers of Graduates

- Battery Resourcers
- Boston Power
- Copper Consulting of Anaconda
- FTI Consulting
- Gopher Resources
- Honeywell
- Radikal Therapeutics

- Severstal Steel
- State Development and Investment Corporation of China
- Umicore
- UTRC
- VJ Technologies
- WPI
Join us…

Spring 2017 Center Industrial Advisory Board (IAB) Meeting

University of Tokyo
Hongo Campus, Tokyo, Japan
May 23-24, 2017
