

# Innovating the Nantucket Tree Inventory

John Amaral, Marc McFatter,  
Yanni Peri-Okonny, Lauren Thompson

**WPI**

Emily Molden  
Cormac Collier

We often take trees for granted.

2

**After the impact of Dutch Elm Disease**  
(Gillet Avenue, Waukegan, Illinois, 1972)

# What is a tree inventory?

# Why do we need a tree inventory?

- Every tree is different!
- Maintenance
- Education

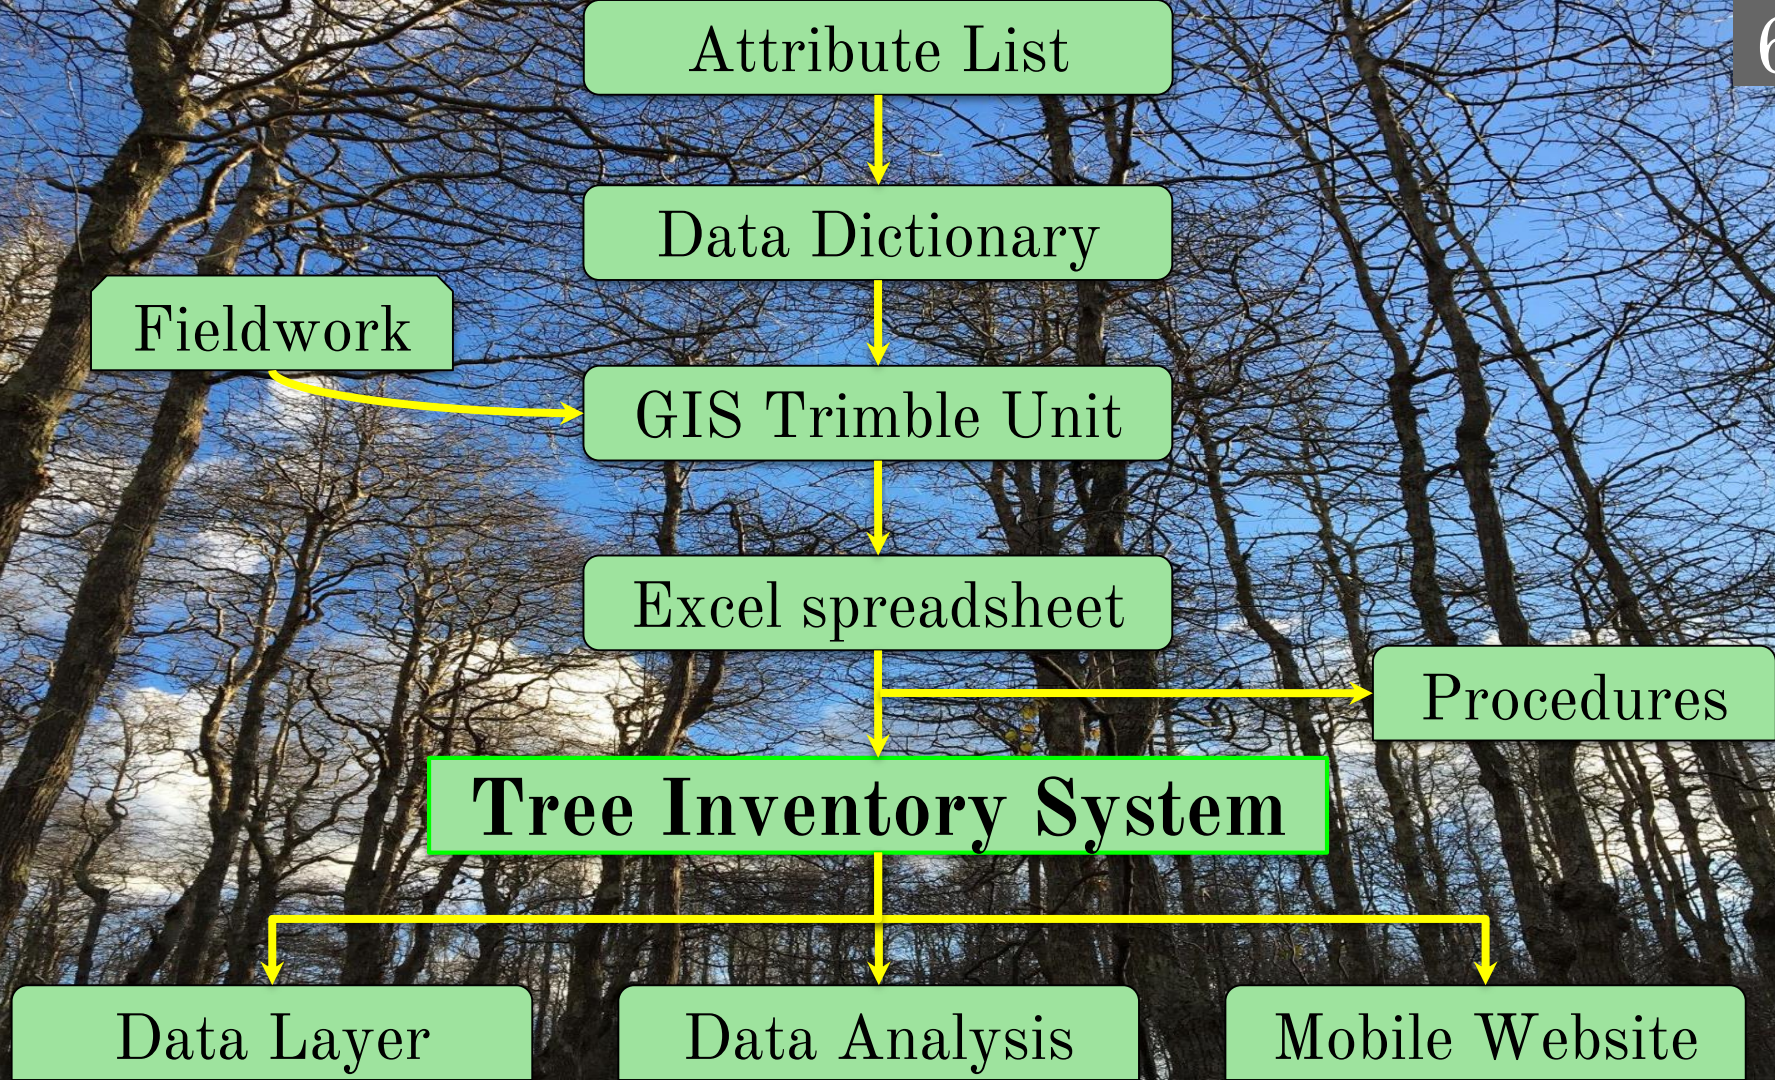

# Project Goal: Enhance urban tree appreciation and maintenance records in downtown Nantucket

- 1) Review previous tree inventory
- 2) Create new attribute list
- 3) Update tree inventory data
- 4) Create an educational mobile website

# Tree Attributes

## Primary

- New/Existing ID Numbers
- Common Name
- Genus/Species
- Location
- Height
- Diameter at Breast Height
- Tree Condition
- Damage/Maintenance
- Other Comments

## Secondary

- History
- Sidewalk Condition
- Diseases
- Date Planted
- Last Sprayed
- Last Fertilized
- Last Trimmed

+4 additional attributes!

# Data Dictionary

# Trial Data Collection

# Final Tree Data Spreadsheet

## EDUCATION

## MAINTENANCE

New ID Number	Historical ID Number	Elm ID Number	Common Name	Genus	Species	Date Planted	History	Location	Height (feet)	DBH (inches)	Condition	Is there damage to the tree?	Does the tree need maintenance?
Main-53	111	886	American Elm	Ulmus	americana	1951	Unknown	Private Land	61-70	28.7	Good	None	None
Main-54	112	876	American Elm	Ulmus	americana	1951	Unknown	Private Land	61-70	30.3	Good	None	Minor
Main-55	-	-	Black Walnut	Juglans	nigra	-	Unknown	Sidewalk	36-40	6.8	Good	None	None
Main-56	-	874	American Elm	Ulmus	americana	-	Unknown	Sidewalk/ Roadside	61-70	25.8	Good	Minor	None
Main-57	-	-	Buisman Elm	Ulmus	minor 'Christine Buisman'	-	Unknown	Sidewalk	36-40	14	Fair	None	None
Main-58	-	870	American Elm	Ulmus	americana	-	Unknown	Sidewalk/ Roadside	71-80	35.9	Good	Minor	Minor
Main-59	-	875	American Elm	Ulmus	Americana	-	Unknown	Sidewalk/ Roadside	71-80	28.9	Good	None	Minor

# Procedures were created and tested to allow others to continue the tree inventory.

## Trimble Unit Operation

## Data Collection Procedure

## Data Processing Procedure

## ArcMap Data Processing Procedure

describes how to export data from ArcMap. Consult this after the "Data Processing Procedure"

ArcMap software on the computer (Figure 1).

GPS Point to the ArcMap project:

the "Add Data" button (Figure 2).

the Shapefiles exported from the "Data

Processing Procedure."

selected that "No Spatial Reference Information is available," select "Okay."

coordinate system for each Shapefile:

click on the first layer (Figure 3).

Right-click "Data" Properties."

coordinate system is defined, skip to step 6.

for each layer listed.

Figure 1  
Icon

Figure 2  
button

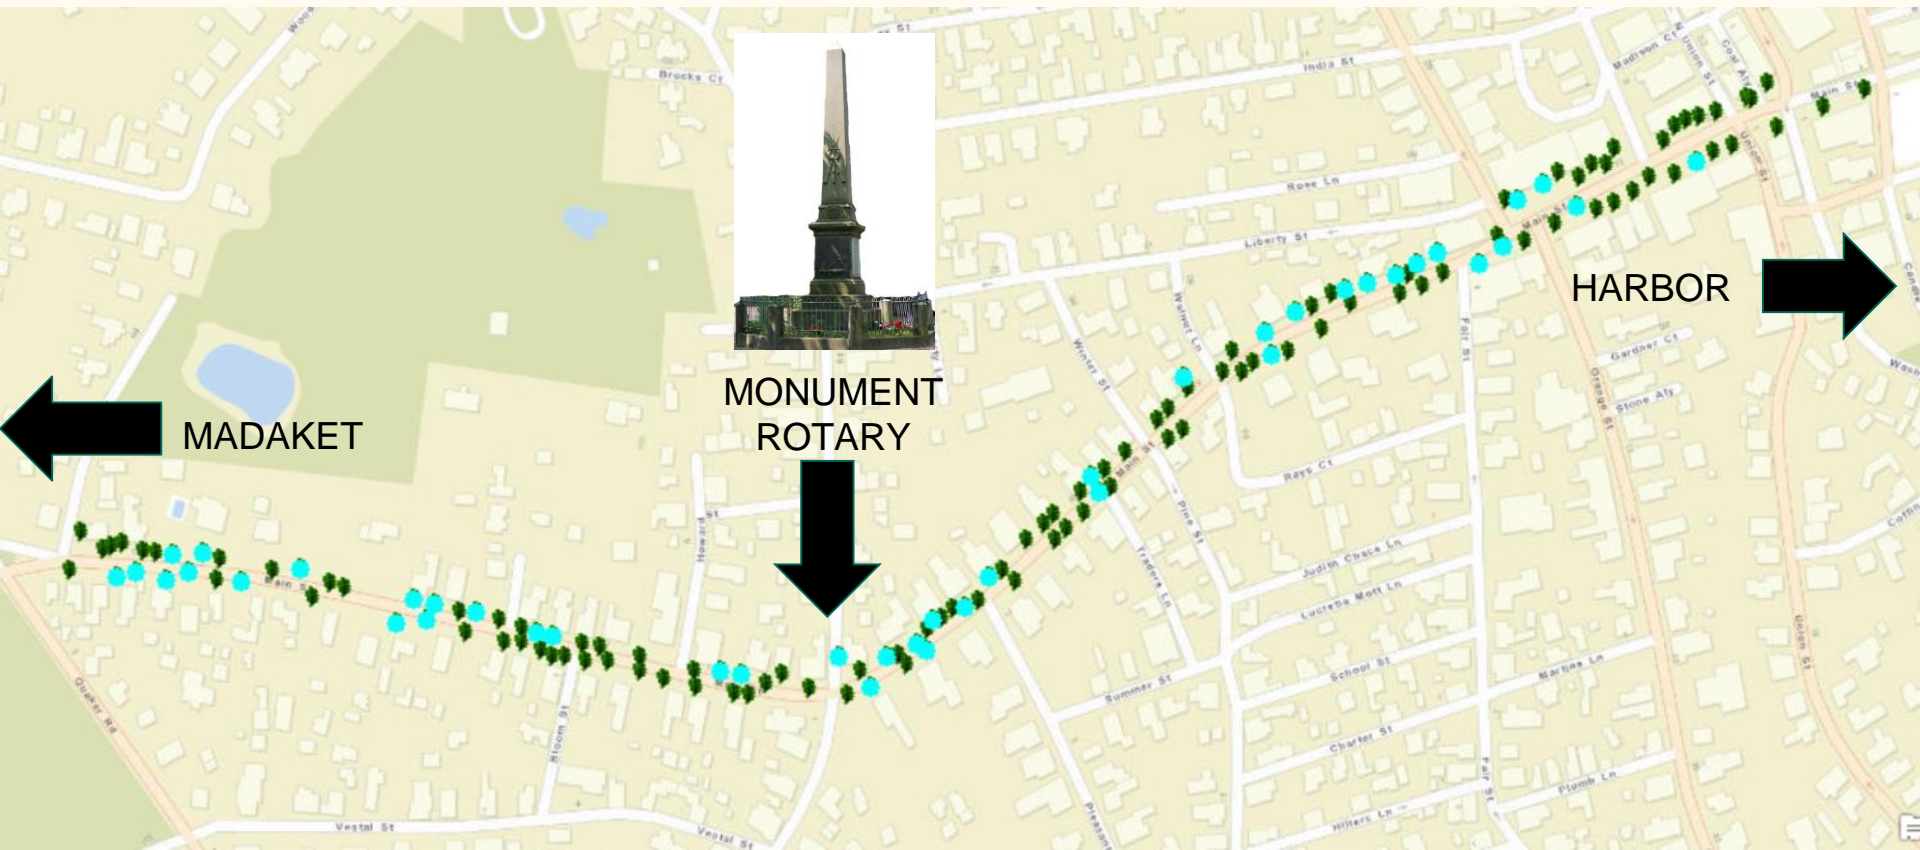

A dramatic sunset scene with a bright sun low on the horizon, partially obscured by dark, silhouetted clouds. The sun's rays create a strong lens flare effect across the sky. The foreground shows the dark silhouette of a field or forest. The title 'Using the Inventory' is centered in a teal, serif font with a subtle drop shadow.

# Using the Inventory

The trees can be displayed on a map using their GIS locations.

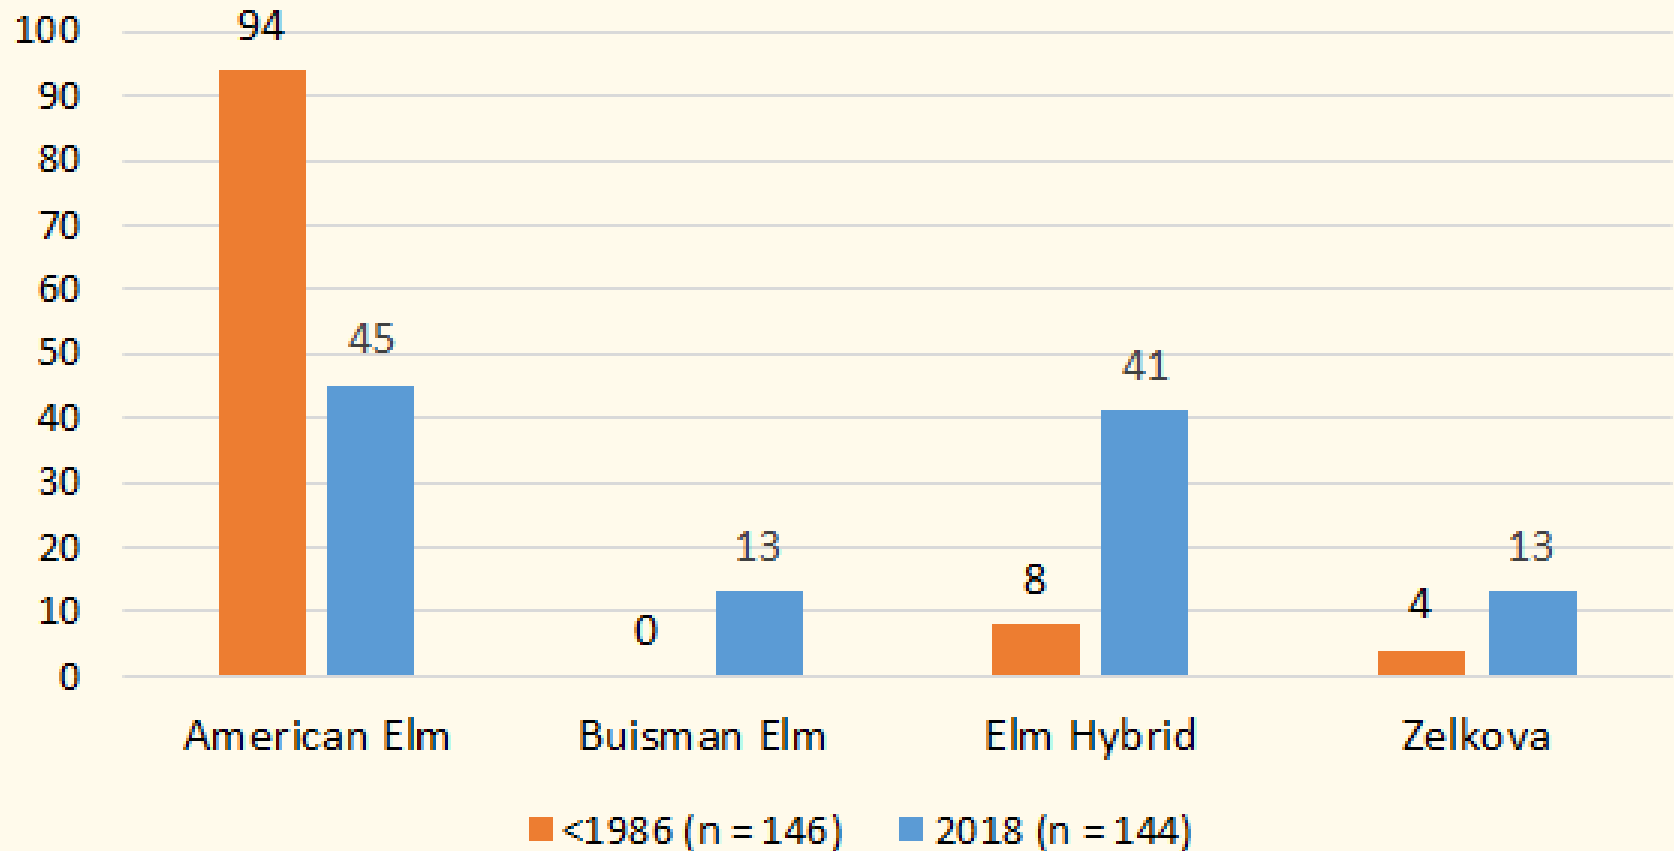

## Number of Tree Species on Main Street

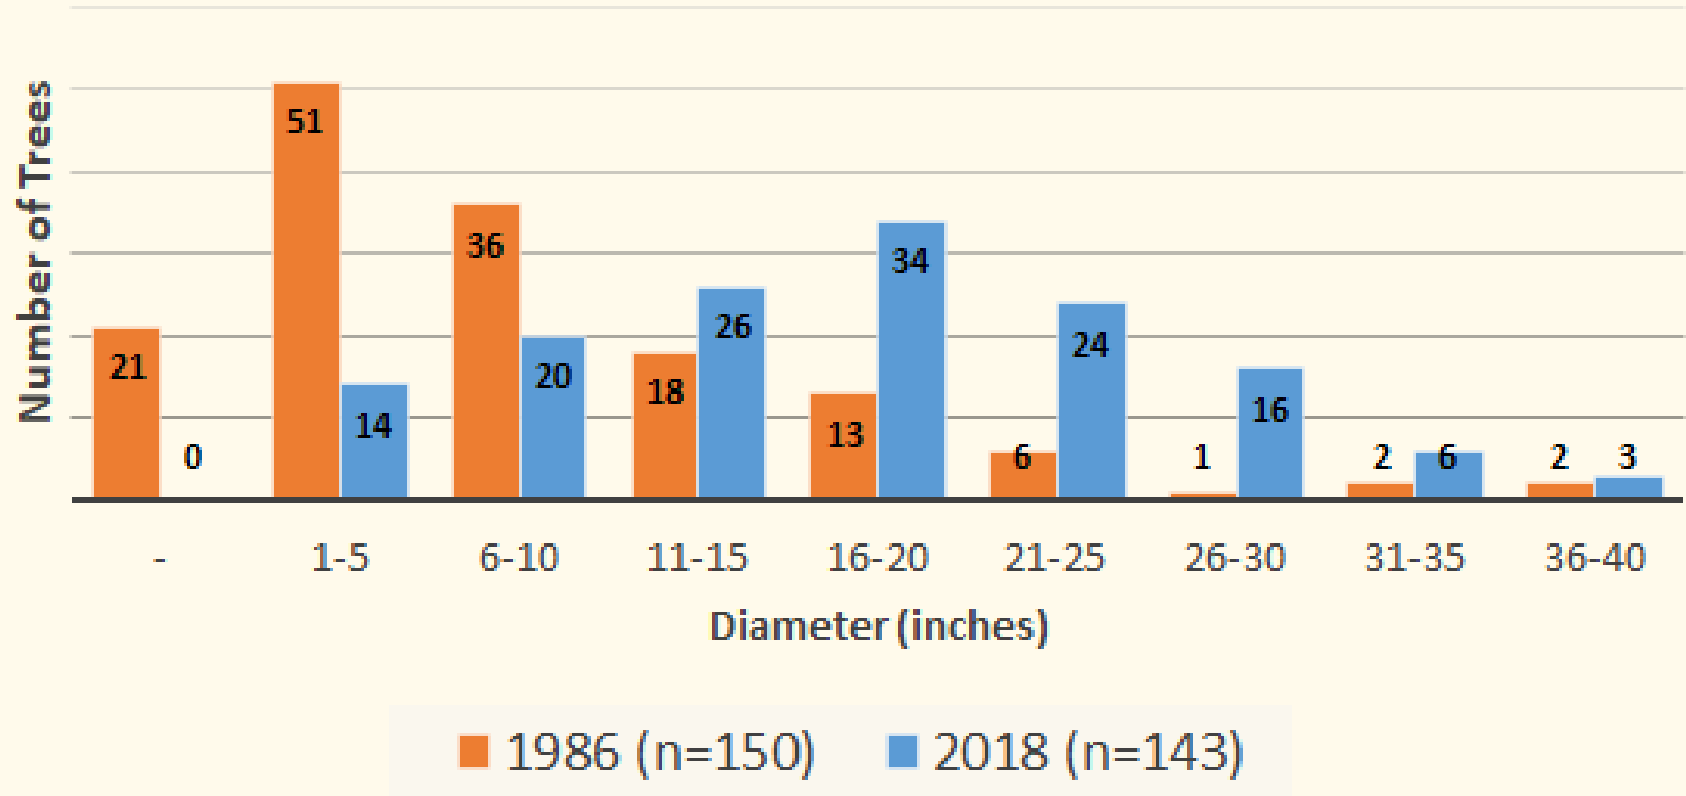

American Elms have been replaced by Dutch Elm Disease resistant species.

## The diameter of many trees on Main Street have doubled since 1986.

Tree Tour

# Project Recommendations

- Remake ID numbers for the trees
- Collect data in summer and winter
- Create maintenance programs from data analysis
- Further develop mobile website
